

Environmental Modeling

U.S. EPA's Office of Research and Development

*Provide science and technology
to support EPA's mission of
protecting human health and the
environment.*

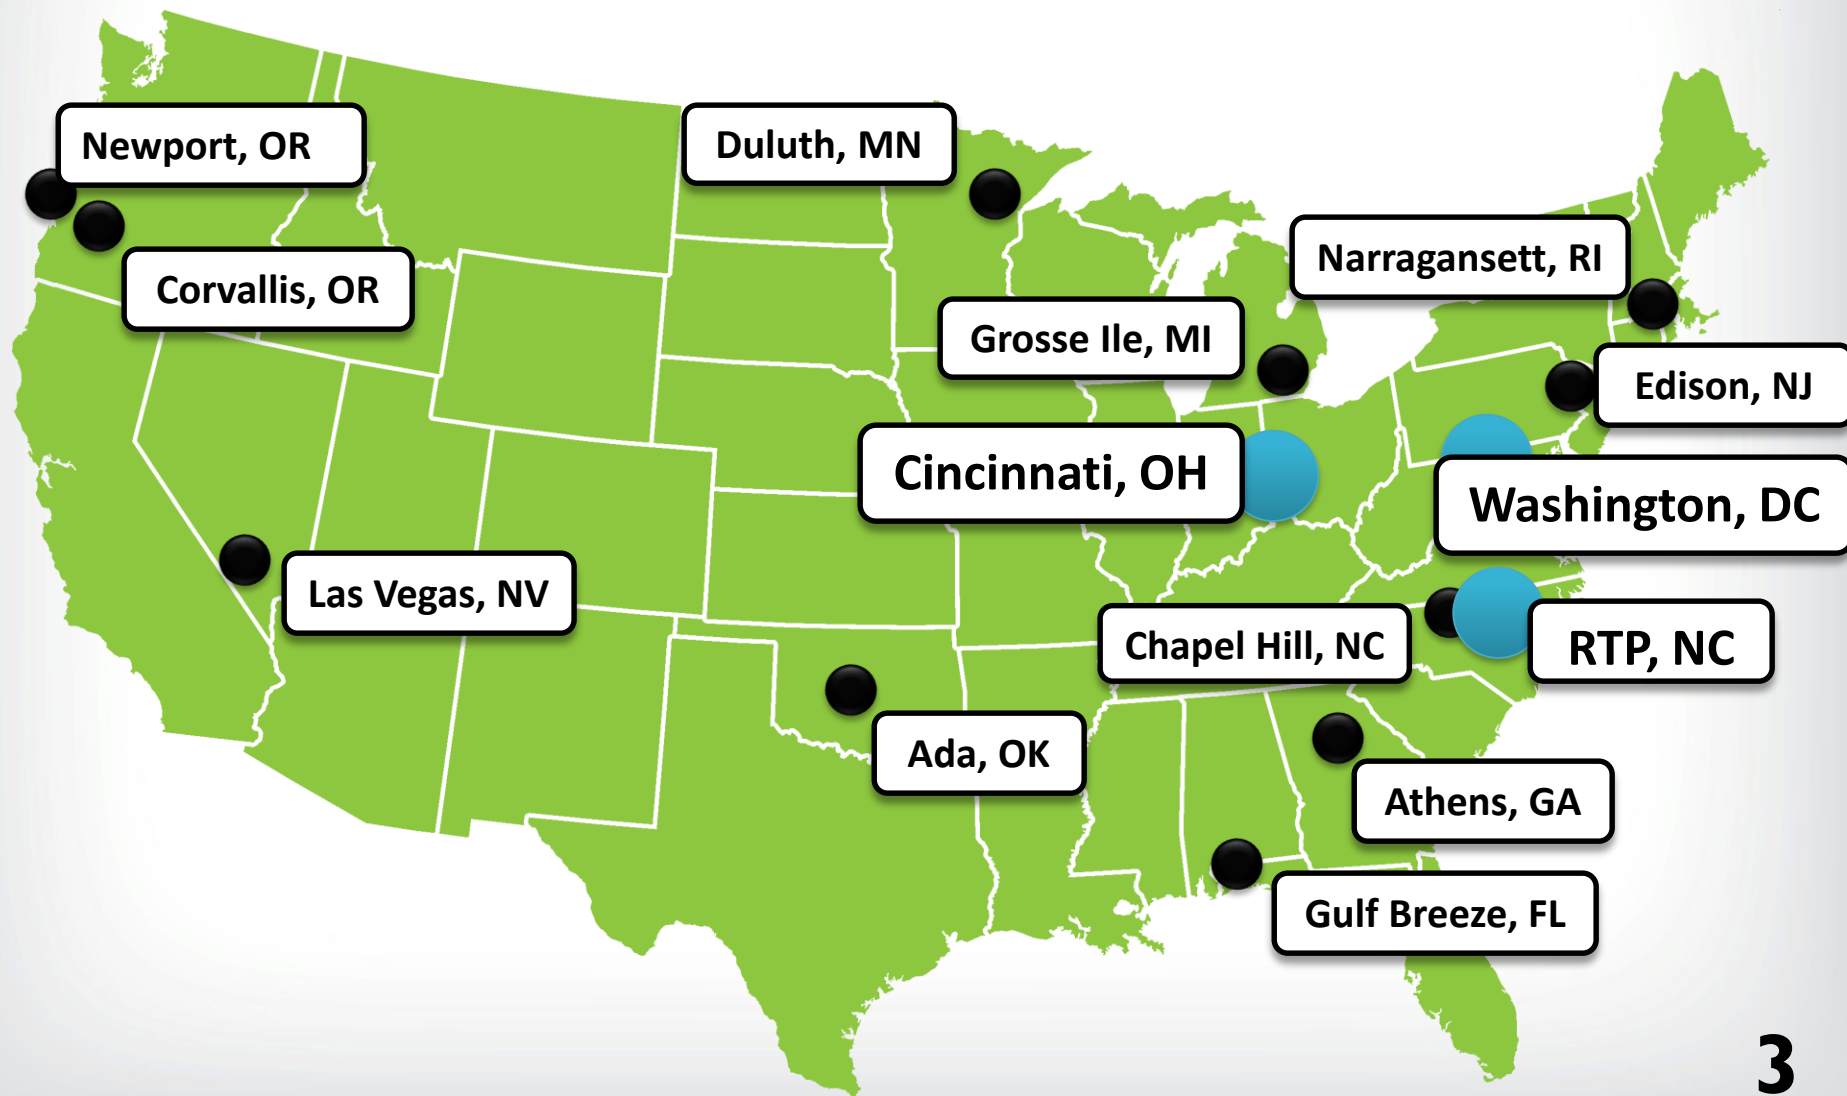

Science to Support EPA's Mission

ORD Research Facilities

Strategic Goals and Research Programs

EPA Goals 2014-2018

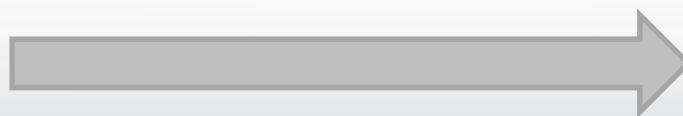

Addressing Climate Change and
Improving Air Quality

Protecting America's Waters

Ensuring the Safety of Chemicals and
Preventing Pollution

Cleaning Up Communities and
Advancing Sustainable Development

Enforcing Laws, Ensuring Compliance

Research Programs

Air, Climate & Energy

Safe and Sustainable Water
Resources

Chemical Safety for
Sustainability

Sustainable and Healthy
Communities

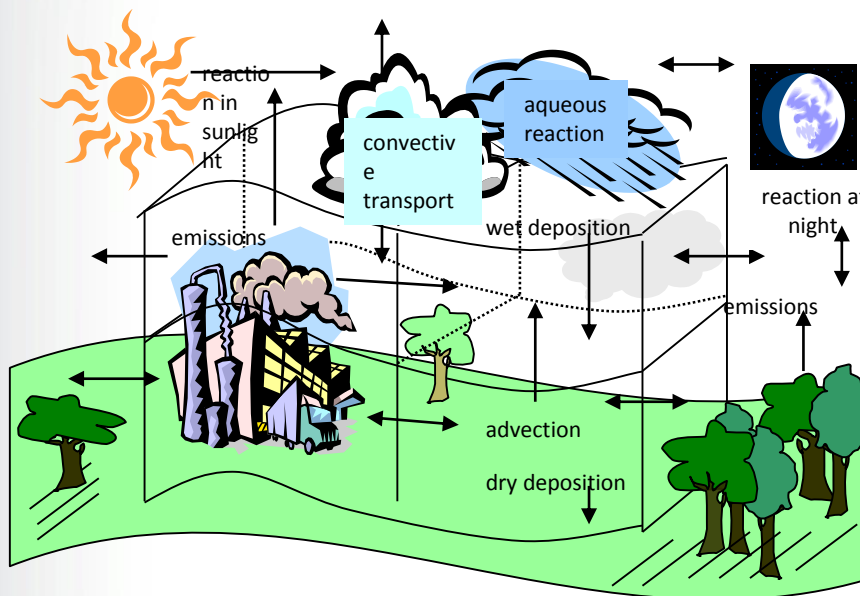

Human Health Risk
Assessment

Homeland Security

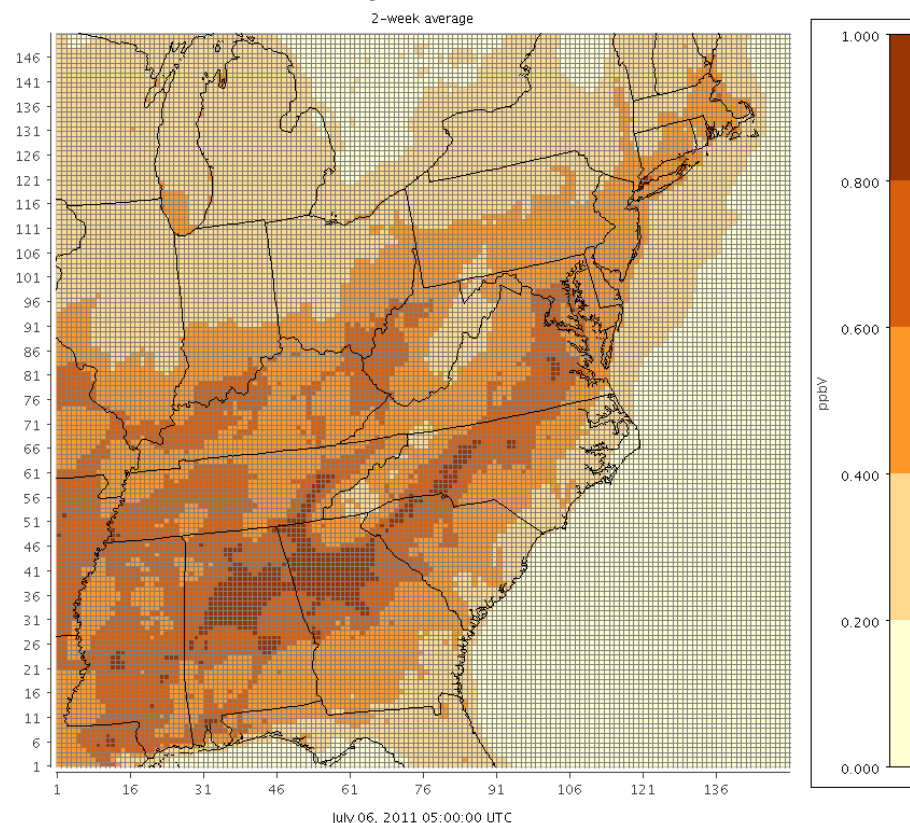

Community Multi-Scale Air Quality Model (CMAQ)

Example CMAQ output

Multiple processes control air pollutant concentrations that vary by hour, location, day and pollutant

surface, total alkyl nitrate concentrations

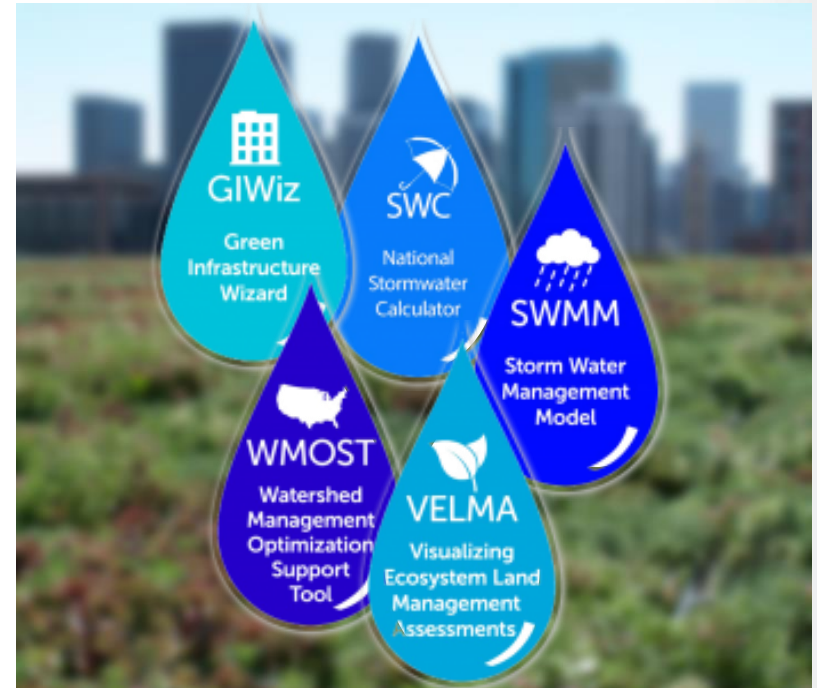

Watershed Models

Green Infrastructure Modeling Toolkit

epa.gov/water-research/green-infrastructure-modeling-toolkit

HAWQS

Hydrologic and Water Quality System – A National Watershed and Water Quality Assessment Tool

News Releases from Region 06

EPA awards \$3.9M to University of Texas for Water Infrastructure Modeling Research Center

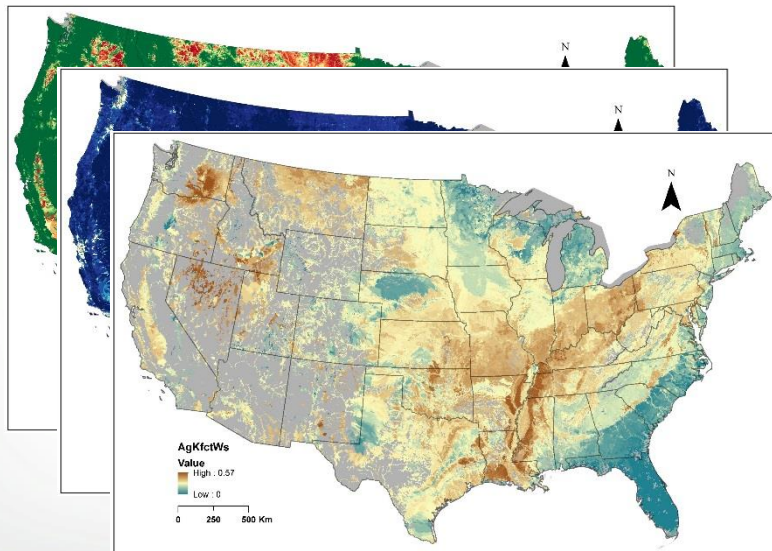

11/02/2016

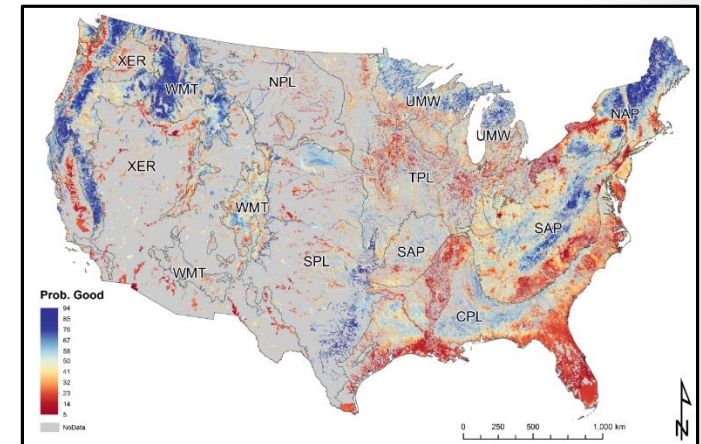

Watershed Tools

National Aquatic Resource Survey (NARS) Data

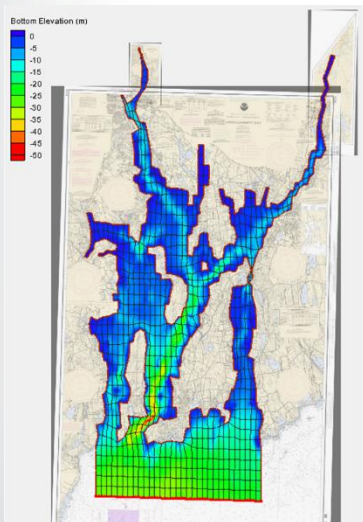

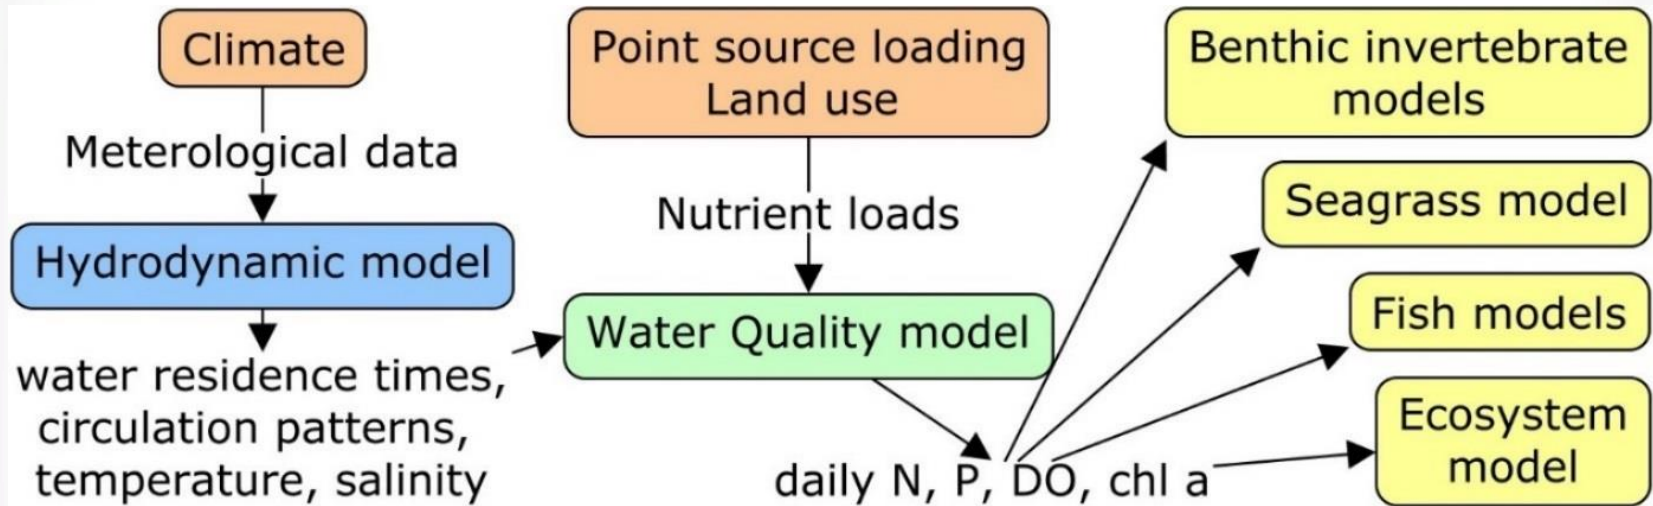

StreamCat Characterization

Model-based condition
(everywhere)

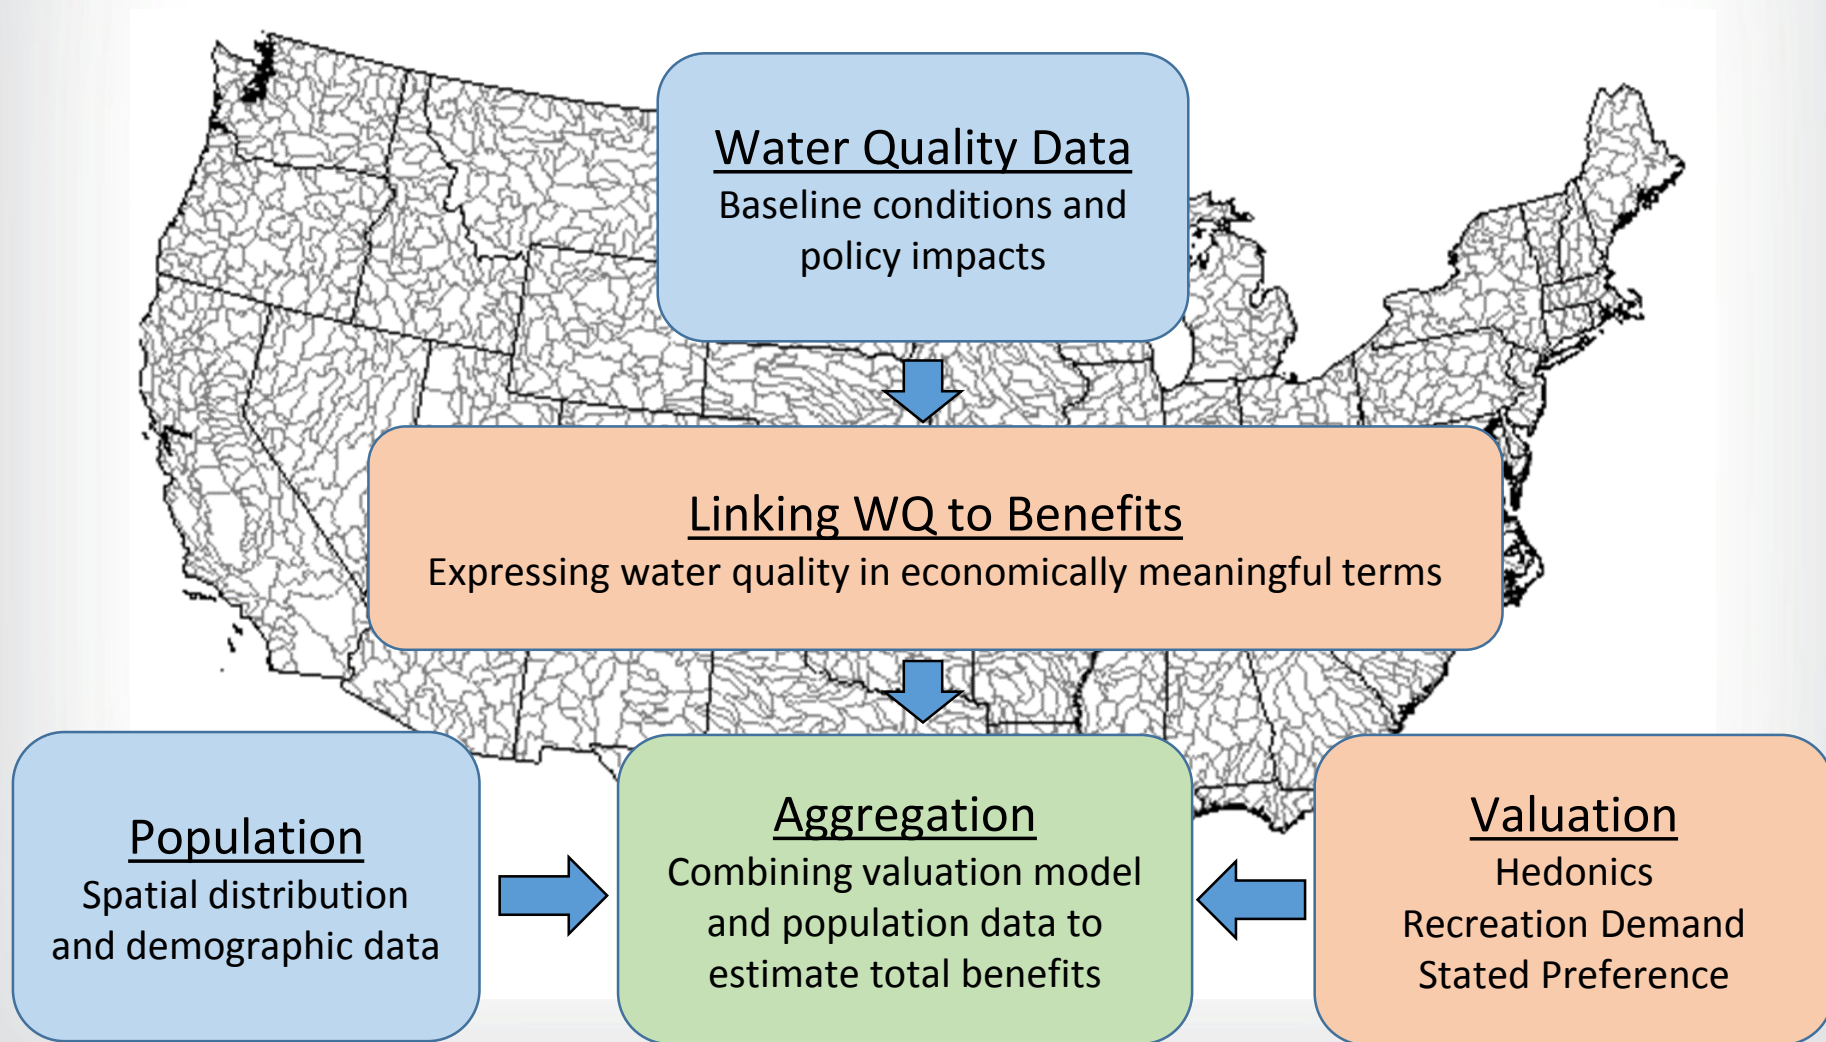

Water Quality Models

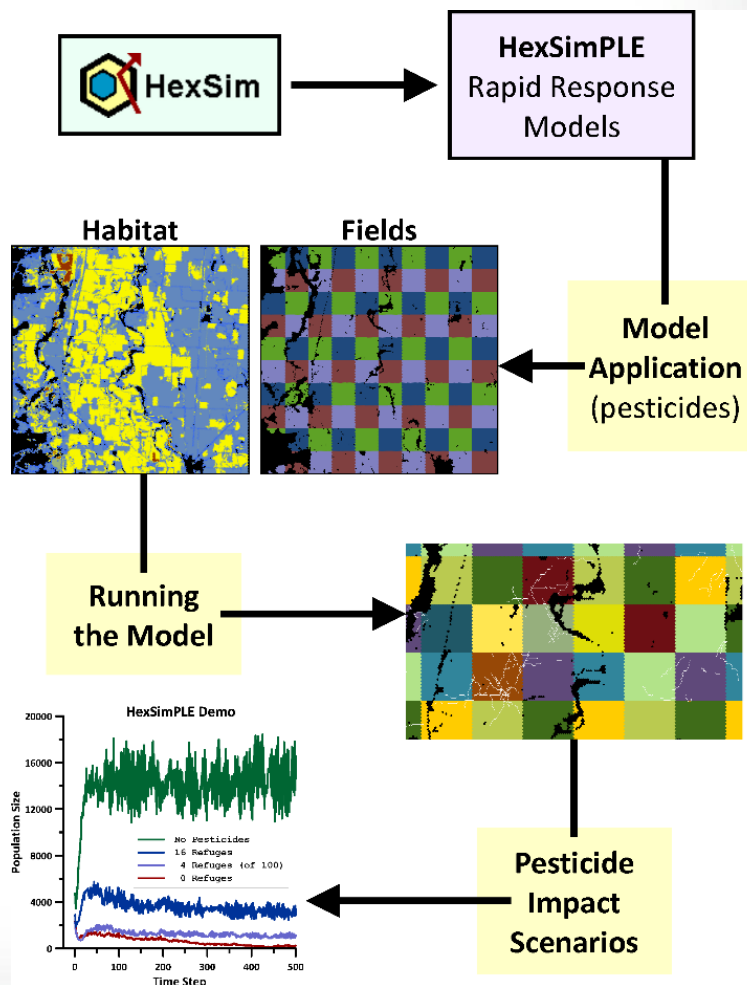

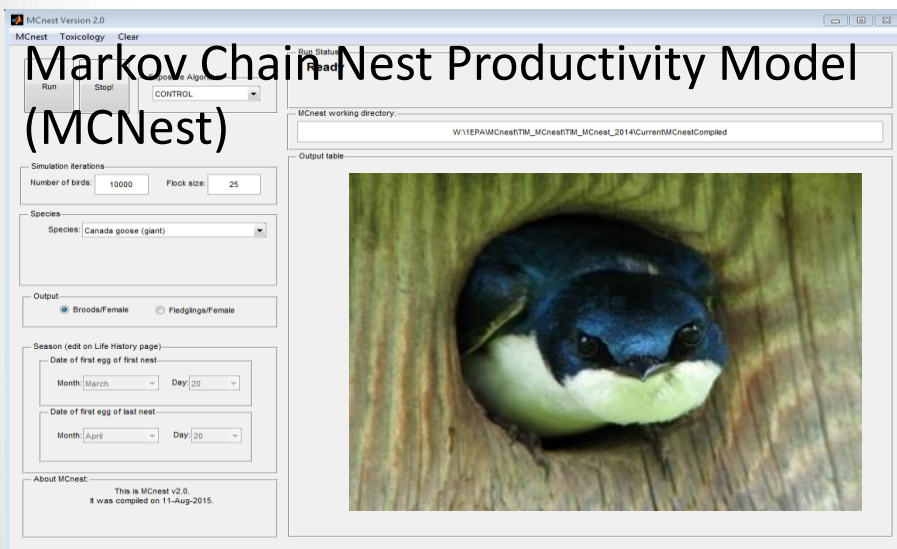

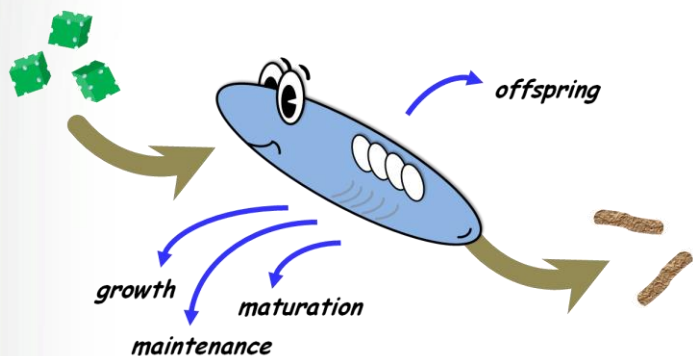

Water Quality Benefits Platform

Population Models for Chemical Risk Assessment

Dynamic Energy Budget (DEB)

Modernizing Existing EPA Pesticide Models

- Map Reduce

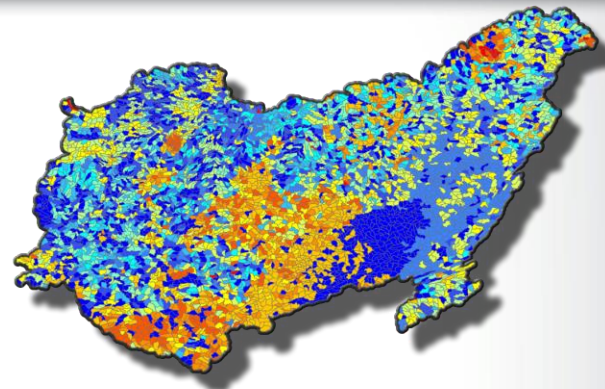

Count # times conc > threshold (0.1 µg/L)

$L = [0, 0, 0.1, 0.24, 0.35, 0.2, 0.12, 0.04, 0]$

```
map(lambda x: True if x > 0.1 else False, L)
```

Map = [F, F, F, T, T, T, T, F, F]

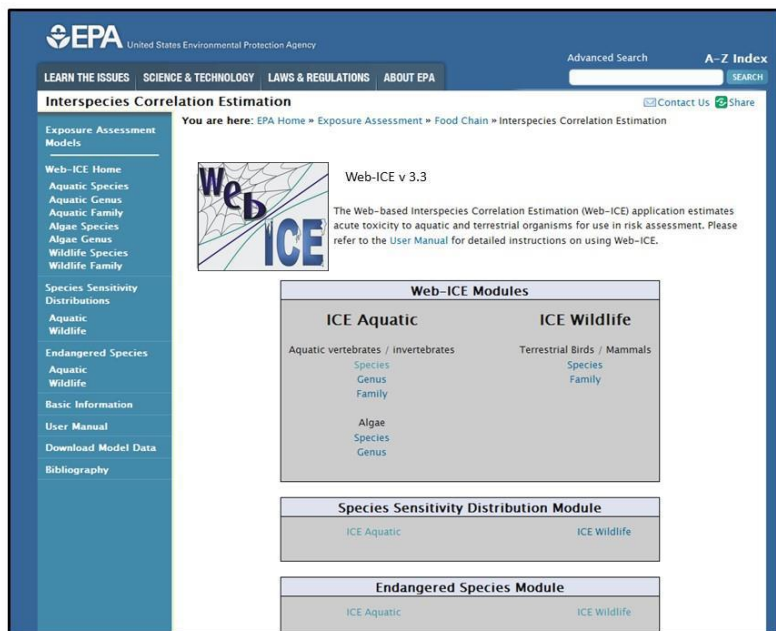

```
reduce(lambda x, y: x + y, Map) Reduce = 4
```

- Parallelization

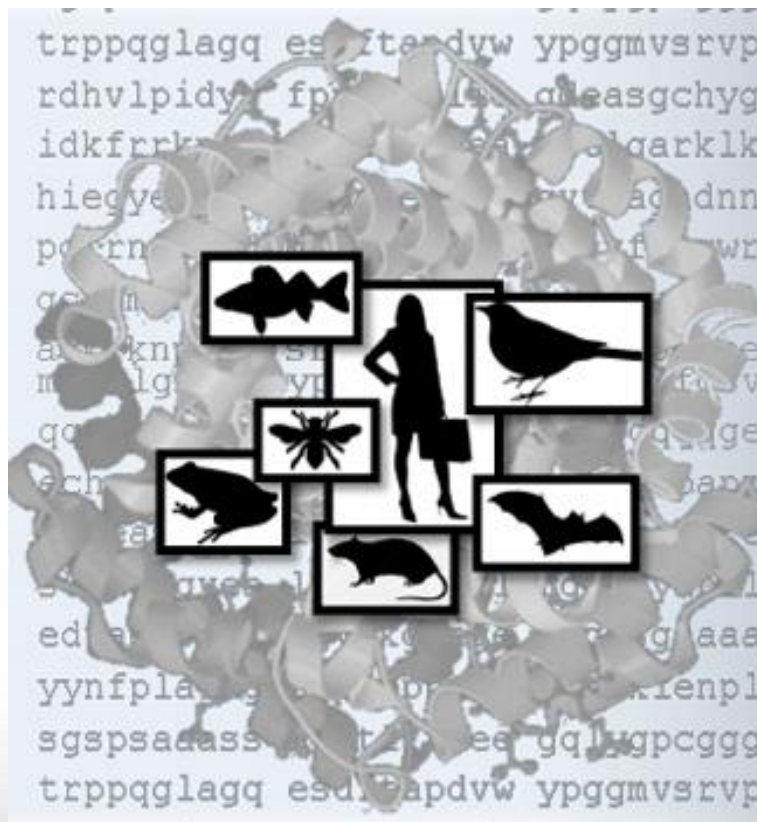

- Cloud optimization to meet computing needs

Interspecies Correlation Estimation (Web-ICE) V3.3 –release June 2016

Estimates the acute toxicity of a chemical to a taxa from the known toxicity to a surrogate species

SeqAPASS: Sequence alignment to predict across-species susceptibility

Ecosystem Services

United States
Environmental
Protection Agency

EPA/600/R-13/ORD-004914
August 2013

FINAL ECOSYSTEM GOODS AND SERVICES CLASSIFICATION SYSTEM (FECS-CS)

BY

Dixon H. Landers and Amanda M. Nahlik

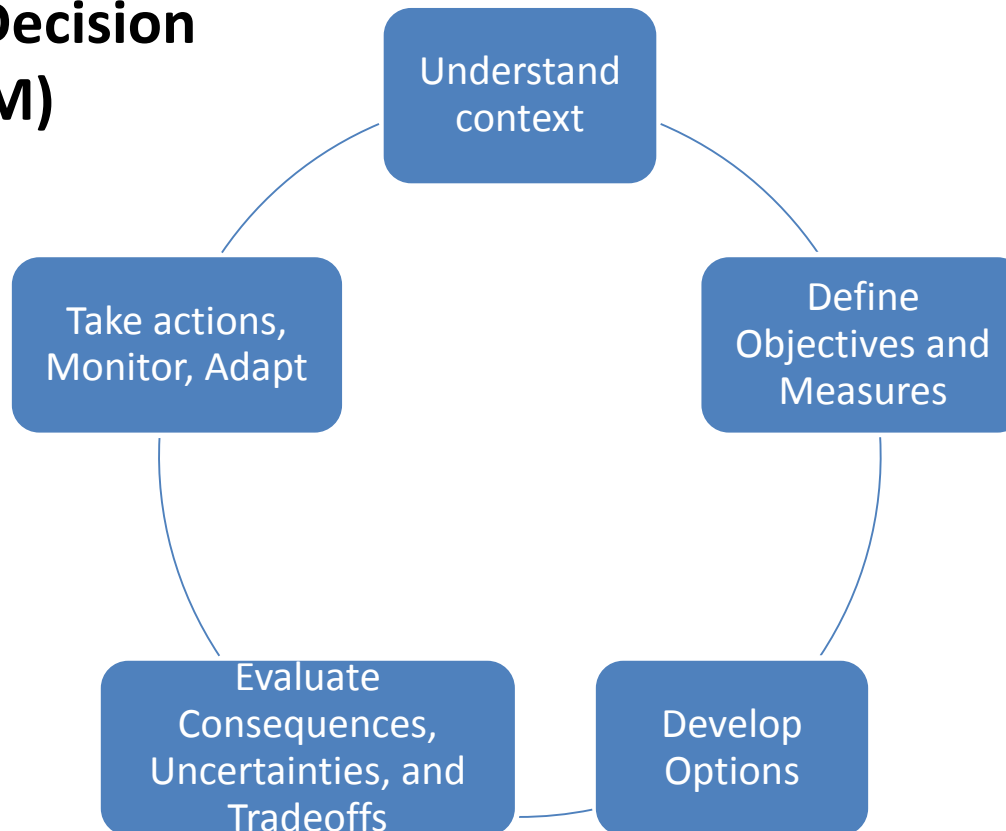

U.S. Environmental Protection Agency
Office of Research and Development
National Health and Environmental Effects Research Laboratory
Western Ecology Division
Corvallis, Oregon 97333

- Formalize and standardize a list of beneficiaries
- Provides an architecture to house metrics and indicators

<https://www.epa.gov/eco-research/final-ecosystem-goods-and-services-classification-system>

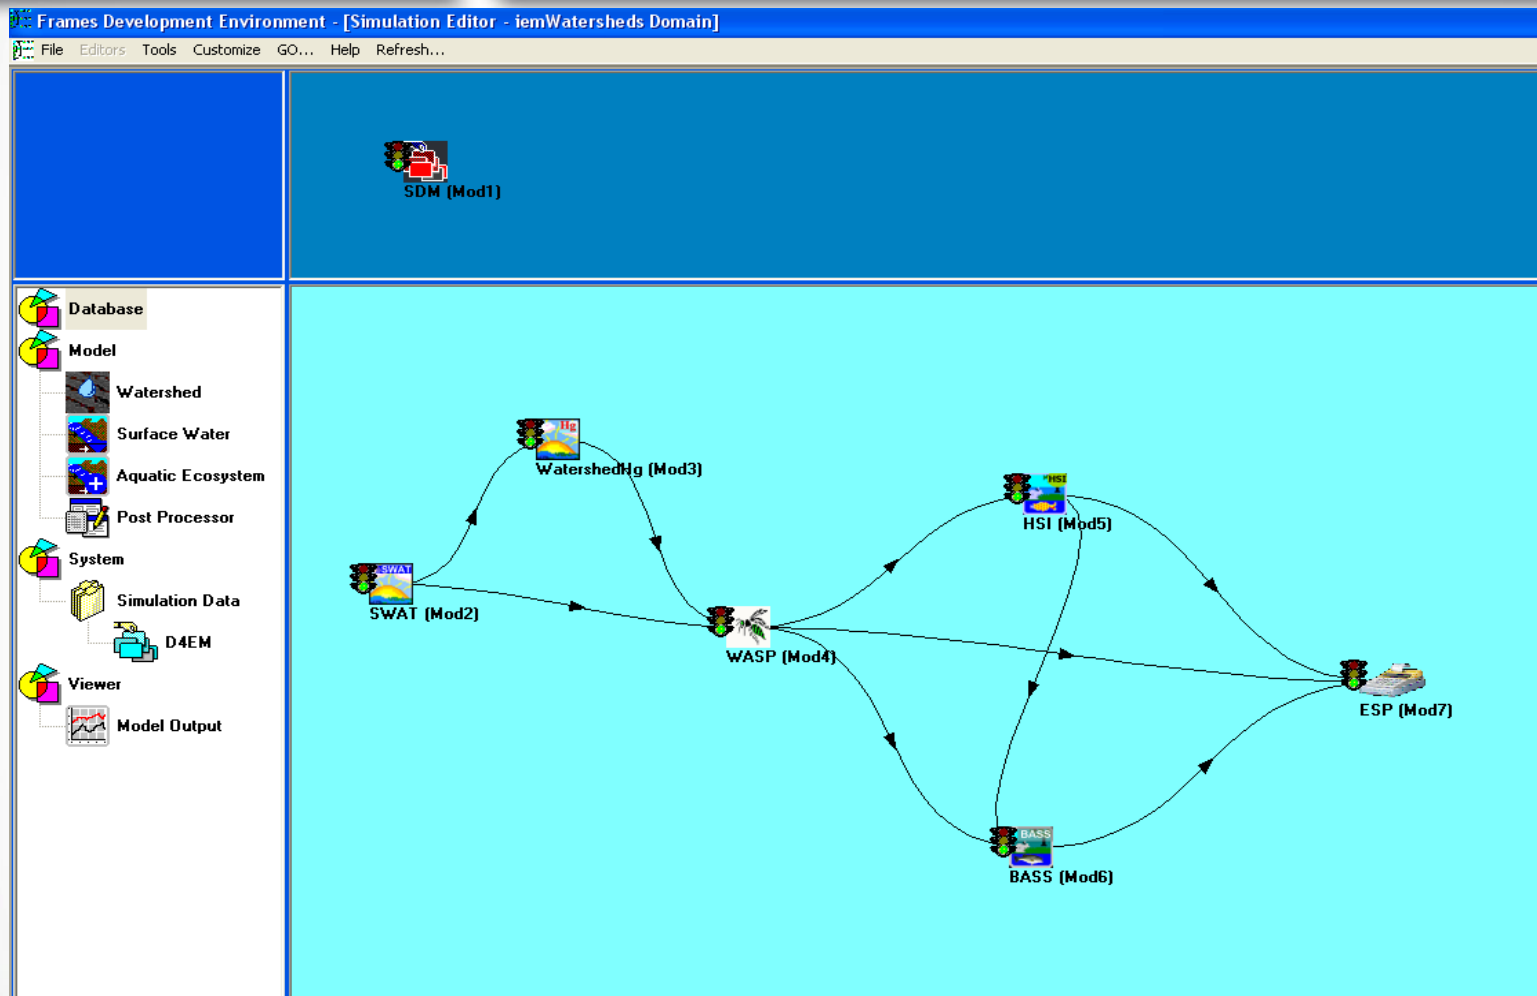

Decision Support for Communities

Structured Decision Making (SDM)

A formalization of common sense for decision problems that are too complex for informal use of common sense

Model Frameworks

- Infrastructure for integrated modeling workflows
- Standards for interoperability (automated data exchange)
- Utilities for uncertainty analysis, data acquisition, information synthesis, data visualization, etc.

A serene sunset scene over a calm ocean. The sun is a bright yellow-orange orb on the horizon, casting a warm glow across the sky and water. The sky transitions from a deep blue at the top to a soft orange near the horizon. Gentle waves with white foam are visible in the foreground, washing onto a dark, sandy beach.

Thank you, Questions?

Rashleigh.Brenda@epa.gov
